

Dreams Petunia

NEW Day Dreams Mixture

Big-bloomed beauties deliver maximum color impact and great all-weather performance.

- Perfectly matched plant habit and flowering across 16 colors
- Very good *Botrytis* tolerance
- Large flowers come in several high-impact solid colors including Red, White, Pink, Blue, Light Blue and more.

Sky Blue

The best large-flowered petunia for landscapes.

Dreams Petunia: 16 colors & 5 mixes

P. x hybrida

Location: Full sun (6 hours or more)

Height: 10 to 15 in. (25 to 38 cm)

Spacing: 10 to 12 in. (25 to 30 cm)

Florida & deep South: Late Fall through early Spring (October 15 through March) – after Summer rains abate and night temperatures drop. Dreams petunias will take a light frost.

Northern & Pacific markets: Late Spring through late Summer

Perfectly matched: Dreams grandiflora petunias deliver uniform performance across all 16 colors, so there is no need to pick and choose from several series to get high-appeal, low-maintenance landscape performance.

Terrific branching and well-matched timing: Start with well-shaped plants with all plants blooming together, and you can count on client-pleasing shows all season.

Healthy through all types of weather: Dreams delivers proven *Botrytis* tolerance to assure season-long garden performance.

Maximum color impact: Large, 3 to 4-in. (7 to 10-cm) flowers on very free-flowering plants deliver huge shows. Special Dreams picotee varieties promise a more stable pattern than other series to hold their appearance all season.

Dreams petunias are bred by Ball Horticultural Company. Ball is dedicated to providing landscape professionals with the latest information and best-performing products for the landscape. Visit balllandscape.com today for more Landscape Color Solutions.

Ordering Your Dreams Petunias

Your preferred grower needs 12 to 16 weeks to produce Dreams petunias.

North: Order November to December

South: Order May to June

EasyScape® Plantable Pots Save Time & Labor, Reduce Planting Waste

- Plant up to 30% faster – go straight from tray to ground.
- Less plastic means less waste for faster clean-up – stack your trays and go.
- No “depotting,” no torn roots, less plant damage, no cut fingers.
- Certified EasyScape growers use organic-based fertilizer to get plants off to a healthy, sustainable start.
